

# BMW CHARGING PRODUCT GUIDE.

FINDING THE RIGHT CHARGING SOLUTION.

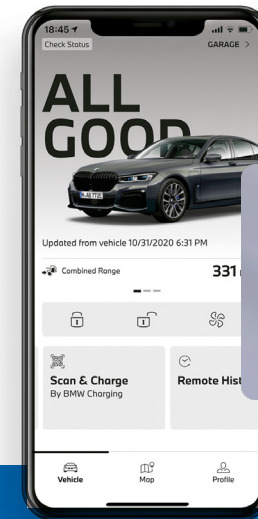

#bornelectric

# CHARGING MADE EASY WITH BMW CHARGING.

Whether electric car or plug-in hybrid, whether at home, on the road or at work: with the individual charging solutions from BMW Charging, all paths are open to you. Benefit from our numerous customised charging offers – and discover electromobility as simply, flexibly and transparently as you wish.

BMW Charging 

# HOME CHARGING.

## HOME CHARGING CABLE.

You don't actually need any complex installation or unit to charge at home. All you have to do is plug the Home Charging Cable into any conventional household 230-volt power socket (3-Pin Wall Plug) – and relax.

With a length of five metres and a maximum power of 2.3 kW, the Home Charging Cable is the optimal charging solution for normal household sockets.

## BMW WALLBOX.

The BMW Wallbox is a home charging station for all Battery Electric Vehicles and Plug-in Hybrid Electric Vehicles. You can therefore charge your vehicle safely, quickly and independently at home. In addition to its space-saving, compact dimensioning in BMW design, the wallbox also offers convenient cable management including plug.

## YOU CAN DO IT IN YOUR SLEEP.

- Wake up, fully rested in the morning to a 'full tank', and start the day, full of energy.
- Just like a mobile phone, you can plug your all-electric BMW into your domestic household socket or BMW Wallbox overnight and it will have recharged completely.

## BENEFITS AT A GLANCE:

- Integrated Cable Management with inlet for the plug and cable holder enables convenient handling.
- Provides a Bluetooth Communication Interface.
- Robust and suitable for outdoor use (IP65).
- Compact dimensions.
- Easy installation.
- Cost optimized installation.
- LED bar at wallbox indicates charging status, operating mode and functional conditions.

# PUBLIC CHARGING.

Your BMW PHEV and Electric vehicle brings a lot to the table, and the city offers the charging infrastructure to conveniently recharge. With ChargeNow by ChargeEV, you can charge across Malaysia in one of the largest and constantly growing public charging networks with over 300 (and counting) charging points. Everything you need for public charging in Malaysia is already included in the scope of delivery of your new BMW with the ChargeNow Card and the Public Charging Cable (Mode 3).

## CHARGENOW CARD & PUBLIC CHARGING CABLE

Your all-round carefree package. The ChargeNow Card and charging cable are included with the vehicle and provide access to the ever-growing BMW Charging public charging network. This allows you to easily find and use public charging points from various operators via the navigation system or smartphone – at advantageous conditions.

## BENEFITS AT A GLANCE:

- 1-year access to all public charging stations from ChargeEV.
- Access to the nation's largest public charging network operating over 300 charging stations nationwide.
- ChargeEV stations can be activated via ChargeNow Card.
- Discover ChargeEV stations across the nation through the BMW Navigation System, My BMW App, ChargeEV App or website.
- ChargeNow Card and Public Charging Cable (Mode 3) are included with the vehicle delivery
- Visit <https://chargenow.chargev.my> for the latest information and FAQ.
